## Stage Set For Big Fair and Stampede Opening Tomorrow

### Weather Superb; Thousands Will Be Present

Everything is in readiness for the twelfth annual exhibition of the Raymond Agricultural Society, and all that is now needed to make the fair and stampede a big success is fine weather. Every detail has been worked out, and the management feel satisfied that all will materialize smoothly and as planned.

Secretary Kimball is now receiving entries and he busy the next few days as the number of entries promises to far exceed any previous year. Every part of Alberta will be represented. Pres. James E. Meeks, who has worked untiringly for the past month, is jubilant. He predicts the best exhibition in the history of Raymond.

The arrangements for the stampede are also made, and it is expected that everything will progress smoothly. Ray Knight and Dick

Kinsey, who are managing this end of the celebration, are both well pleased with the equipment. Over 200 rods of pole fencing has been done, and about 250 horses and cattle will be assembled for the sensational events billed for Wednesday and Thursday.

From a sporting standpoint, the exhibition promises to surpass anything attempted in the past. The Stampede, advertised for Thursday and Friday, is going to be the biggest event of its kind pulled off in Alberta since the famous Calgary Stampede of a few years ago. The money is forthcoming, the business men and ranchers standing behind Ray Knight to a man. Every advertised purse will be paid. There will be no skimping. The Stampede is being conducted on strict business principles.

The country has been combed for the meanest "brooks" on the southern range, and Ray Knight says he has a line on some wild ones. There will be steers on the grounds that have not yet seen a wire fence. They will be roped and ridden before the eyes of the crowd. A bunch of calves will be branded just like it is done at the western ranches about round-up time.

#### GOOD RACES

The racing card, also, is attracting widespread interest among turf fans. The stables are nearly full with racing stock, and more are coming. The racemoot will draw the fastest horses in the province without a doubt, both running and harness animals. If you fall for the ponies don't miss the race meeting here on the 30th and 31st.

#### K. A. OPENS SEPT 1st

The Knight Academy will open on Sept. 1st, according to the calendar issued by that institution. The only change in the faculty is in the domestic science and arts department. Miss Romney, sister to the president, will have charge of this work. She is a graduate of the B. X. U. of Provo.

Within the last week Mr. and Mrs. Ray Knight had the pleasure of entertaining Mr. K. Wood of Wood Bros Live Stock Commission Co. of Chicago, the Hon. Duncan Marshall and his secretary L. C. McLaugh, Mr. Robinson of the Clay Robinson Live Stock Co. of Chicago, and Mr. H. Thomas of the Clay Robinson branch at St. Paul.

The mayor has declared Wednesday and Thursday afternoons civic holidays.

FOR SALE. For cash, any terms or will trade for either cattle or horses two improved town lots, description, Lots 4 and 5, Bldg. 178, Plan 4489J. There is a good house, barn and other buildings on lots. Apply, Bert Kenny, Raymond.

## Faced With Serious Shortage Our Waste Paper Becomes Asset

With the alarming increase in the price of paper, caused by the world-wide shortage, the appeal made by Hon. Mr. Foster, minister of Trade and Commerce, for the conservation of waste paper throughout the Dominion, is very timely. The paper situation is a problem today. Since the war it has practically doubled in price, while some of the better grades are off the market entirely. Thousands of tons of waste paper are destroyed every day. Instead of this again becoming raw material it is burned or done away with in some other way. In Germany where efficiency has been the keynote for generations, every bit of paper and every can, is carefully collected and utilized time and time again. It has occurred to The Leader that the waste paper of Raymond might be conserved in some way. There are firms who will pay for this material, and some good, reliable boy could do very well in collecting and shipping it. Canada must exercise economy in her natural resources and the products manufactured therefrom, or the day will come when she will become impoverished as many countries are today.

## South's Record Crop Now Being Reaped

Harvesting is now in progress in the Raymond district, and will be general this week-end. George W. Green cut a beautiful 40-acre field of fall wheat last Tuesday, and Walter Zebelle commenced cutting Friday. Other farmers in the Raymond and Wollong districts have binders in the field cutting barley and extra early wheat.

The run on binders this year has been great. Z. N. Skouson alone has disposed of sixteen machines and has a number of other orders. The other implement men also report a brisk business.

The twine situation has greatly improved. No shortage is now expected, as large quantities have been released from Manitoba Saskatchewan, and the Dakotas where the harvest is only estimated at about fifty percent. This has relieved the local situation very satisfactorily.

It is not expected that there will be any labor shortage. Hundreds of field hands are coming in from the States and the eastern provinces, and several thousand soldiers were released last week from Sarcee Camp. They are seeking work in the harvest. It is expected the soldiers will be granted about two months leave if their assistance is required.

It is too early to venture an estimate of the crop in the south this fall, but it is a big one. It will fall below last year, but not by a very wide margin.

#### MILL OPERATING

Reports from Taber are to the effect that the new Harris roller mill is in operation and turning out a good line of products. T. W. Harris, of Raymond, is the promoter, and his venture is being watched with interest.

The Grystal Dairy, Lethbridge, Raymond Station is here to stay. Your

## Wilson McCarty In The Political Arena

Wilson McCarty, son of Mr. and Mrs. Charles McCarty, of Raymond, and who resided in this country for many years, was the unanimous choice of the Democrats for district attorney for the judicial district comprising the counties of Salt Lake, Summit, and Toole. He was unopposed in the convention and stands a good chance of election.

Wilson McCarty, although a young man, is considered one of the ablest men in the Democratic party in Utah. His Alberta friends will watch the campaign confronting him, and they will be among the first to offer congratulations if he is elected.

Secretary Kimball wishes to announce that up to Monday evening entries will be accepted at town office and Tuesday at the exhibition grounds. All exhibits must be in at 9 a. m. Wednesday.

Mr. and Mrs. Ray Knight motored to Milk River Tuesday accompanied by Messrs. Robinson and Mr. Thomas of the Clay Robinson Live Stock Co.

The department of agriculture are operating a labor exchange in Lethbridge for the convenience of farmers. The office is in charge of J. A. Weir. Inquiries for men should be made direct to him.

Elders T. O. King and David Galloway were home missionaries to Lethbridge last Sunday.

Miss Louise King has accepted a position in William Blair and company's drug store.

Mr. Fleming, the Calgary stock buyer, spent a few days in town this week, a guest at the Raymond Hotel.

The Raymond boys of the 175th battalion arrived home last week from Sarcee Camp, and will assist in the harvest. This splendid body, commanded by Lieut. Col. Spencer, of Medicine Hat, is expected to go overseas sometime in October.

# Live News of Busy Magrath

## Looks Like Fine Fair

Arrangements are shaping up well for the Magrath Fair which will be held Tuesday and Wednesday, Sept. 5 and 6. It looks like one of the best fairs that Magrath has ever had. Wednesday's racing program is hard to beat, and will attract a fine string of horses. Make entries early.

## Local Notes

A. Mercer returned to Utah last Monday. He has mining interests in that state and spends very little time in Alberta now.

Mr. and Mrs. A. F. Geddes spent a few days in Lethbridge last week with their son, who is in the battery stationed in that city. They were guests at the Alexandria.

Mr. Hugh Grant, of Grant and Davies, was a business visitor to Lethbridge last week.

Mr. and Mrs. Fred Bradshaw motored into Lethbridge Friday. They were registered at the Alexandria.

George A. Hacking made a business trip to Calgary this week purchasing repairs for his threshing outfit. Mr. Hacking recently returned from an extended tour of Utah, Wyoming and Idaho. He is a stronger friend to Alberta as a consequence, as he says there is nothing in those states to come up to this magnificent province.

The Magrath friends of Lieut. R. W. Page will be pleased to learn of his elevation to the rank of captain. Capt. Page is with the American Legion stationed at Toronto.

In employing men for the harvest, The Leader would call the attention of farmers to their duty toward our brave boys in khaki. They should begin the preference. We can not do too much for those men who are making such tremendous sacrifices for the common cause of humanity.

Mr. Mercer now has the following members of his staff for the public school, J. E. Earl, vice-principal, Miss Watson, Miss Mercer, Miss Davis, Hillier, and Mrs. Lynn, of Leavitt, whose husband is with the Canadian forces in England. There is still one vacancy on the staff.

The farmers north of Magrath are certainly setting a good pace for the rest of the district. With fine homes fitted with all modern conveniences, and large neatly-painted barns, they are deserving of much hearty commendation. It is a credit to them and the district.

### SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

**T**HE sole head of a family, or any male over 18 years old may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-agency for the District. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-agency) on certain conditions.

**Duties:**—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section along side his homestead. Price \$1.00 per acre.

**Duties:**—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. **Duties:**—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$200.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Livestock may be substituted for cultivation under certain conditions.

W. W. COBY C.M.G.,  
Deputy of the Minister of the Interior.

## Building Boom.

It is almost certain now that the Magrath Trading company will build a handsome brick business block on the corner of Main and First South St. this fall. The directors have held a number of lengthy sessions and today at a meeting, it is thought that the matter will be given the final O.K. It is shown that the rapidly expanding business of this company demands larger and more modern quarters.

With the erection of a brick block by the Royal Bank, a new home for the Magrath Hardware company and the building now underway for the Long Jim Co. Main street will take on real metropolitan airs this fall.

An event of more than ordinary importance is the Flower and Vegetable Show which will be held during the Magrath fall fair, Sept. 5 and 6, under the auspices of the Women's Institute. Prospects are bright for a splendid show this year. The officers are bending every effort to maintain the high standard set last year, and they urge all who have nice flowers or good vegetables to make entries. Boost the Flower and Vegetable Fair.

Misses Norma Woolley and Annie Hillier, two prominent Magrath girls, left last week for Salt Lake, where they will reside indefinitely.

T. K. Roberts, contractor in charge of the new block for Long Jim, is rushing the work to completion, and says it will be ready for occupation in about a week.

# SIR PENYERN'S WIFE

## FLORENCE WARDEN

Ward, 1st & Co., Ltd.  
TORONTO

(Continued)

Sir Penryn waited to hear no more. He knew that his household had relieved itself into an army of apes and gnomes, and while he would have been free to follow the garden was carrying out, and why the wheelbarrow was pushed inside the shed so hurriedly, he thought it better to mock his curiosity.

He returned to the house, and was met in the hall by his wife's maid, Salter, who was in a state of distressful excitement, and her little maidling knelt to him red-rimmed with weeping.

"Oh, Sir Penryn," cried she, clashing her hands with dramatic effect, "now you play the part of a doctor! For my ladyship's ill, I'll tell you, she is as good as dead. She lies in her bed and feet, and her head's as hot as fire."

Sir Penryn, alarmed, tried to reassure her. He did not want the doctor to be brought to the Hall that night; for Dr. Gold, though a clever practitioner, was a bit of a gossip. Still, he might be the worst, and might find out too much.

"I'll go upstairs and see her," said he quickly.

But Salter protested. "You'd better leave her by herself, Sir Penryn," she cried in high treble. "I do believe she's better off even you just now. She shivers when she sees a door open."

"Nonsense," said Sir Penryn shortly. "It's no nonsense, indeed, Sir Penryn," she said. "I've had the greatest trouble getting her out of her dressing gown, and now she's lying on the sofa and won't get up."

"I'm sure," said he, "that you're right, but which is the best place for her, I'm sure."

Sir Penryn was struck by the tone the tiny lady's maid was taking. Usually, Salter, who had been with her since she was a girl, never before assumed the protesting tone towards her mistress which she was now using. The baronet was annoyed with the girl, and he passed her and went up without saying a word.

Entering the larger room with the vaulted ceiling, he found that the baronet's wife, Lady Penryn, was sitting on the sofa, her head buried in her hands, and her face as white as paper.

"What a large folding screen in front of the door, and she's sitting in it," he said. "I don't think she's quite so well as she was before she was able to see the doctor."

"As he peeped at her from behind the outer fold of the screen, he saw the figure of his wife stretched out on the sofa in an attitude of utter exhaustion. One arm hung down towards the floor, and she was raised above her head, as she lay back with her eyes closed, and her lips parted."

Her face was very pale, and the masses of her fair hair hung loose about her head, and over the white silk dressings, which she wore, and which were caught together with a bow of pale blue ribbon.

It cut him to the heart to see the depression of utter misery—misery so acute that it had the effect of physical pain—upon her beautiful features, and he felt at the moment that he would have been willing to give up his life for her, in order to bring her back to her former state of health.

He felt at the moment that he would have been willing to give up his life for her, in order to bring her back to her former state of health. He felt at the moment that he would have been willing to give up his life for her, in order to bring her back to her former state of health.

## Term of Peace Boy Scout Movement

American Paper Comments on Opinion Expressed by Lord Bryce

No Englishman has a higher place in the esteem of the American public than Lord Bryce, and his statements of the reasons why the allies cannot consent to a permanent peace have greater weight with many than any official pronouncement.

Speaking at a luncheon, London in honor of James M. Beck, he said that he had received an address, signed by some Americans, a large proportion of whom had come from Germany, urging that, since the war must end in a draw, it was best to make peace at once, and his statement was met with a storm of protest.

The plan is not novel; it has been put forth, though not in so many words, by the German government. As Lord Bryce pointed out, however, neither the premise nor the conclusion is admissible.

He said that the allies have made too many sacrifices to be contented with that. They are bound to fight on until they have won a complete and lasting peace.

Lord Bryce is confident of the former, not only because of the recent successes in the field, but because of the moral and financial superiority they hold over the enemy.

He said that the allies have made too many sacrifices to be contented with that. They are bound to fight on until they have won a complete and lasting peace.

He said that the allies have made too many sacrifices to be contented with that. They are bound to fight on until they have won a complete and lasting peace.

## Mecca's Stone of Tears

Tradition Says It Was Once Pure White, But Is Now Black

Year by year a great pilgrimage consisting of from 15,000 to 20,000 Moslems, make the journey to Mecca, and it is on these occasions that the great men have jockeyed the dangers associated with such an enterprise, and managed to gain access to the Holy City.

But a wrong guess, a false word in one of the prayers, the slightest inquisitiveness in looking at some fascinating relic has been their undoing.

The cry has gone up, "A Christian, and the mob has rushed at them and torn them limb from limb."

Mecca is, indeed, the holiest ground of the Mohammedans, and the mosque is the Holy of Holies. The building stands on ground which Arab tradition declares to be the centre of the world, ground which the Moslems believe to be a part of heaven on earth, and which will return to heaven at the last day of life.

Inside this building is the sacred black stone towards which all Moslems turn in worship. According to tradition, the stone was given to Abraham by the Angel Gabriel, and was originally pure white, but has become black from the tears shed for sin by the many pilgrims who have kissed it.

In connection with the pilgrimage, it is the custom of the Moslems to kiss the stone, and the British government who are in charge of the safe conduct of the pilgrims, have been very anxious to prevent any such incident.

German Valet Was Spied

Servant Employed by a High Government Official Arrested as a Spy

It is a common question whether a man Secret Service has just been illustrated by an incident in London.

A man, who had been in the service of a high government official for some time, was arrested on suspicion of being a spy.

The man, who was a valet, was found to have been in contact with a German agent, and was therefore arrested.

The man, who was a valet, was found to have been in contact with a German agent, and was therefore arrested.

## Thunderstorms and Milk

Lowering of Atmospheric Pressure Believed to be One Cause of Milk Turning Sour

It is common knowledge that milk turns sour very quickly during a storm that it does not normally weather.

Various theories have been advanced to explain this. A Frenchman has recently suggested that the phenomenon is related to the fact that the lowering of atmospheric pressure during storms, the barometric readings always being low, then the gas which is in the lower portions of the milk can more easily rise to the top and thus promote the action of the lactic acid bacteria.

Lightning has a direct effect and the fermentation of the milk is more rapid during summer and winter storms is more rapid during the latter.

On the other hand, carelessness as to the fermentation of the milk is more rapid during summer and winter storms is more rapid during the latter.

On the other hand, carelessness as to the fermentation of the milk is more rapid during summer and winter storms is more rapid during the latter.

**WATERBURY'S EAST**  
MAKES PERFECT BREAD

**Nothing New Under the Sun**

According to researches by a French professor, it would appear that submarines have almost as hoary a past as aeroplanes, which, as is well known involve ideas which are centuries old.

It also appears that submarines were built as early as the beginning of the seventeenth century. The origin of the invention is older still, Aristotle tells how Alexander the Great made use of submarines during the siege of Tyre more than 300 years before Christ.

A Dutchman named Cornelius Van Drebbel, stationed in London in 1620 with a submarine that held twelve rowers and some passengers, among them was King James I.

Previous to this, in 1534 a monk suggested the idea that a ship be constructed of metal, so that it would be strong and able to resist the pressure of the water.

In 1537 a ship with twenty cannon, eighty sailors, many bags of money and a large crew, was built in the port of Dieppe.

There was a later a Frenchman, Jean Barrie, called Pradine, built, according to the old Pradine, like a submarine with the propellers in the stern.

But it is not on record that any of the great mariners, such as Columbus, sailed in such a craft.

But it is not on record that any of the great mariners, such as Columbus, sailed in such a craft.

To have the children sound and healthy is the first care of a mother. It should be, for the child is the mother's joy and her life.

We need the plain, healthy truth, that to achieve the best results, we often leave college possessed of a self-centered notion that the world is made for them.

Grandson of "Marshall Forward" Blucher No Friend of Prussians

Prince Gohard Blucher, son of Prince Blucher, was born in 1891. His father was a Prussian general.

Prince Blucher carried on a long warfare with the city of Berlin over taxation and similar matters, for the greater part of his life. He was obliged to leave his palace at Brandenburg as a civic and political matter.

Litigation with his ten children also occupied a good deal of the Prince's time. His eldest son held a salaried position in London, which he lost at the beginning of the war.

Professor Archibald, of the Royal Astronomical Society, Berlin has organized an increasing exhibition which is being patronized by all classes of society.

A particularly popular object advertised as possessing occult protective power is a "Letter from Heaven" which is being sold in huge quantities.

It is described as an "unfailing" protection against all evil influences, witchcraft, and works of the devil.

Bearing the mystic initials "S.J.K." and "M.H." it is said to be the command of the Angel Michael.

Letters from the Kaiser are exhibited in the gallery.

Prof. J. C. Clark of Queen's University, who has returned from Holland, where he spent an invitation of Prof. H. K. Kerkhofs, the famous director of the great physics laboratory in Leyden University.

Investigating further into the question of liquefying air, states that he succeeded in determining more accurately the temperature at which air liquefies than the results of the point experiments of Professors van der Waals and others.

In the proceedings of the Royal Academy of Amsterdam, Prof. Clark expressed the opinion that liquid air has a great commercial future, and that it would be installed at Queen's by Prof. Clark, so that he may continue his experiments.

**Favorite Hymns**

Some Hymns of the Christian Church, Both Old and Recent Compositions

The majority of sacred songs in common use today are compositions of modern years, the hymnologists of this century, and a few of which contributions have been preserved and are extant within the hymnals of present times.

An effort of the hymn writer in the Christian of the Greek, Syriac and Latin in the fifth century.

This "Canticle of David," "Think O Me," has been translated by Rev. A. J. C. Clark, and is considered a masterpiece of verse in remote era.

Upwards of one hundred hymns have come from her pen. The "Safe in the Arms of Jesus," is of world wide knowledge.

To John Mason Neale, an Episcopal vicar, forty-four hymns must be credited; the major number are translations from Greek and Latin of very early period.

One of the best known hymnologists of recent decades, was Richard, Bishop of the English diocese of Exeter, who is credited to Christendom, fourteen songs.

"Words," is coined in most sublime language. The hymn "O Lamb of God," is a beautiful composition of "Words," "There is a Happy Land, Far away," thus a hymn of sacred verse.

The evening song, "Gloria in excelsis Deo," is a hymn of praise, and is a hymn of praise, and is a hymn of praise.

There is a hymn of praise, and is a hymn of praise, and is a hymn of praise.

There is a hymn of praise, and is a hymn of praise, and is a hymn of praise.

**Big Munition Contracts**

Value of Shell Deliveries in Canada Average Nearly a Million Dollars a Day

The announcement that the Imperial Munitions Board has ordered from the British government further orders of shells for delivery early in 1917, brings the total of orders in Canada for shells to over \$5,000,000 worth of shells.

The new order is for 500,000 shells, and will be delivered in 100,000,000 shells.

At the present time deliveries are averaging nearly \$1,000,000 worth per day. By the end of the year, Chairman Flavelle, of the munitions board, expects the output will be at least \$3,000,000 worth per month.

At least \$300,000 worth of orders are now in process of being filled by some four hundred Canadian firms.

The new law-making plant established near Montreal is now in satisfactory operation, and Canada can now produce for Great Britain and the United States.

As one means of meeting the situation, the munitions board, however, is recruiting the women to work in munitions factories.

**Sunlight a Benefit**

And Health and Cleanliness

Sunlight is a great germicide. Pioneer grandmothers did not know much about germs, but they knew modern principles when they used sunlight to clean their clothes.

The sun to "soak," as they said. Sunlight, as well as fresh air, should be used as a part of the general plan of house cleaning.

The thirty minutes of bright sunlight, and the air to keep carpets and draperies from fading under a large dose of the influence of modern methods of sanitation.

The airing and sunning of bedding every week, all the year round, is a most important part of good housekeeping, but one which is much neglected, especially by women who are in flats, where space is very often sacrificed to esthetics.

Therefore, it becomes imperative that at house cleaning time, the under side of rugs, carpets, mattresses and cushions should be exposed to the sun for as long a period as possible.

Sunlight is free to all. Flats will not thrive without it. Animals love to bask in it.

It is a germicide, and by doing so it incurs unnecessary danger from tubercle, and other diseases.

Sunlight is free to all. Flats will not thrive without it. Animals love to bask in it.

Sunlight is free to all. Flats will not thrive without it. Animals love to bask in it.

**Use of Drag Harrow**

From an Address by the Hon. R. W. Motherwell

The history of the harrow is as old as that of agriculture. We are not told by the sacred writers whether Adam used one in the Garden of Eden or not, but in any case it was invented about that period.

In ancient times, only the lighter soils were cultivated and the harrow often consisted of branches of trees, which merely scratched the surface of the ground. At first the work was done by hand, but in the time of Job we know that animals were used for the purpose. He says: "Will the unicorn harrow the valley after thee?"

Even today in the remote districts of Europe the brush harrow is used. But the march of progress does not stop there. The harrow has been improved into line. We find that the old "A" harrow had been originally consisted of heavy timber, with cross bars attached by lashings among the Romans in use, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

It was made of iron, and it was made of iron, and it was made of iron.

## RAYMOND LEADER

Published Every Friday  
\$1.50 a Year in Advance

F. C. STEELE, Editor

The Raymond Fair and Stampede will be held this week, Tuesday, Wednesday and Thursday. May the most signal success crown the splendid, willing efforts of the management and promoters.

Get out your flags Tuesday. Unfurled the dear, old Union Jack to the breeze. During fair week Raymond should take on a suitable attire, flags and bunting and all that sort of thing. It will help out wonderfully.

The Lethbridge Herald very aptly raps the fingers of the Calgary News-Telegram editorial writer for suggesting a wheat palace for the internationally-famed "Cow Town." We agree with the Herald alright, but would suggest a little more discretion or we will have to call Lethbridge, "Hog Town." In the same issue the photo of Lieut. R. W. Page is prominently displayed on the front page, and of course this young officer "comes from Lethbridge." Lieut. Page enlisted from Magrath and no town but Magrath can legitimately claim him. Surely, Lethbridge don't want to hog everything in sight.

Great Britain recently blacklisted a large number of U. S. firms. Uncle Sam immediately got the official typewriter under way and dispatched—a note, of course. Dear Old Uncle Sam, he does some very foolish things sometimes. The legality of Britain being unquestionable, it makes the U. S. look ridiculous and almost "unfriendly." A great paper, the Philadelphia Public Ledger, says of Wilson's latest diplomatic episode "From any point of view the note is untimely and unwise."

We heard a good Christian lady remark the other day, "He looks like God had forsaken the world." That same evening we read an article from the New York Sun in which the statement was made that a recent judicial investigation into the pelting of the vice district of that city, had brought out the staggering evidence that "twenty houses thus far known paid \$50,000 in the last year and a half for their shame." This was paid to the police for their "protection." They sold their last spark of honor receiving in return the earnings of prostituted womanhood. If Almighty God has not forsaken the world, it is a wonder. The world has certainly forsaken Him—the great majority at least. Until men return to the plan revealed in the philosophy and life of Jesus Christ, until they conform to the divinely perfect moral, social and civic code, wars, famines, plagues, pestilences, and divers other dire calamities, may be expected. It is the eternal law of cause and effect in operation. There is no escape.
